

A Guide to Olympia Oyster Restoration and Conservation

APPENDIX 1
SUPPLEMENTAL INFORMATION
ABOUT PROJECT FUNDING
AND TEAM COMPOSITION

APPENDIX 1. Supplemental information about project funding and team composition.

This project was led by an interdisciplinary team from the San Francisco Bay and Elkhorn Slough National Estuarine Research Reserves, and was developed in partnership with the California State Coastal Conservancy and the University of California at Davis. The management questions addressed in the project arose directly from prior needs assessments of local and regional end-users: oyster restoration practitioners and the coastal decision-makers who set regional restoration policy and provide funding. Project staff consisted of program managers, applied scientists, graduate students and technicians, together having several decades of cumulative experience working at the interface of science and estuarine management. Core project staff and their roles and affiliations are as follows:

Matt Ferner, Principal Investigator, San Francisco Bay National Estuarine Research Reserve and San Francisco State University, mferner@sfsu.edu

Marilyn Latta, Collaboration Lead, California State Coastal Conservancy, Marilyn.Latta@scc.ca.gov

Andy Chang, Co-Principal Investigator, San Francisco Bay National Estuarine Research Reserve and Smithsonian Environmental Research Center, ChangAL@si.edu

Ted Grosholz, Co-Principal Investigator, University of California at Davis, tedgrosholz@ucdavis.edu

Kerstin Wasson, Co-Principal Investigator, Elkhorn Slough National Estuarine Research Reserve and University of California at Santa Cruz, kerstin.wasson@gmail.com

Chela Zabin, Co-Principal Investigator, University of California at Davis and Smithsonian Environmental Research Center, zabinc@si.edu

Jill Bible, Graduate Investigator, University of California at Davis, jmbible@ucdavis.edu

Brian Cheng, Graduate Investigator, University of California at Davis, bscheng@ucdavis.edu

Anna Deck, Graduate Investigator, San Francisco Bay National Estuarine Research Reserve and San Francisco State University, akdeck@gmail.com

Acknowledgments

Funding for this project was provided by the National Oceanic and Atmospheric Administration (NOAA) through the National Estuarine Research Reserve System Science Collaborative, which was jointly administered by NOAA and the University of New Hampshire. Significant in-kind contributions were provided by San Francisco Bay National Estuarine Research Reserve, California State Coastal Conservancy, University of California at Davis, and Elkhorn Slough National Estuarine Research Reserve. Additional partners contributed significant time and energy towards data collection at supplemental sites, including the Richardson Bay Audubon Center and Sanctuary, and The Watershed Project. John Haskins provided water-quality data at Elkhorn Slough, Dolores Leonard set up Basecamp and designed our initial project summary documents, and Kalle Matso attended our initial stakeholder workshop and provided input on collaborative process throughout the project. Sarah Ferner assisted with field monitoring in San Francisco Bay and expanded the project by initiating a project-based learning program at two local high schools. Elena Ceballos, Rebecca Isquith, and Calissa Anderson provided substantial assistance with field and laboratory work. Laboratory assistance was provided by Joe Newman, Karl Menard, Charlie Norton,

Chris Knight, Kaylee Griffith, Kelly Laughlin, Phil Jones, John O'Brien, Carol Star, Doug Hooper, Miki Takada, Linda Rose, and Paul Stull. Additional field assistance was provided by Peter Deck, Blu Forman, Beth Gillespie, Laura Gray, John Haskins, Zack Kaufman, Inger Marie Laursen, Daniel Vee Lewis, Laura Mehner, Alger Omongos, Amada Peters, Carrie Stevenson, and Dean Vila.
